

Ergo[®] Soil L-40

Recommendations and Dosage in Different Crops

Foliar or Soil Applications

Application to the Field

Mix with the fertilizer (foliar or soil, liquid soluble or dry soluble) to be applied on your crop at a dosage of 5% to 10%. The mixture can be added to the tank with the solution to be applied to the crop. Apply your fertilizer using your normal application system.

Application Added to Liquid Fertilizers

Mix with the liquid fertilizer at the formulation process at a dosage of 5% to 10%.
